

# MODEL 213 & 215 DIL LASERMOUNTS

The model 213 & 215 DIL LaserMounts are an excellent choice for electrical connection and thermal management of 14-pin DIL and 8-pin mini-DIL lasers. These mounts feature zero-insertion-force (ZIF) sockets and fully configurable wiring.

## UNIVERSAL WIRING INTERFACE

An easy screw terminal block with color coded wires makes setup simple for any pin configuration.

## QUICK LASER LOADING

Zero-Insertion Force (ZIF) sockets create secure electrical connections in seconds.

## ACTIVE HEATING AND COOLING (MODEL 215)

The 215 LaserMount includes a built-in Peltier device and temperature sensor for bi-polar temperature control.

## COPPER COLD PLATE (MODEL 215)

100% copper cold-plate with hard nickel plating for maximum performance and scratch resistance.

## STANDARDIZED CABLE CONNECTORS

Connect to Arroyo Instruments laser drivers and temperature controllers with standard DB-9 and DB-15 cables.

## OPTIONAL FIBER MANAGEMENT TRAY

Add the fiber management tray for easy handling of even fine optical fibers.

## AT-A-GLANCE

### DIL Lasers

- ▶ 8-Pin Mini-DIL
- ▶ 14-Pin DIL

### Cooling Mode

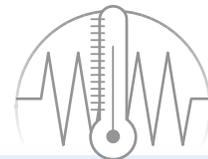

- ▶ Passive Cooling (Model 213)
- ▶ Active Heating & Cooling (Model 215)

### Model 215 Thermal Capacity

- ▶ 1.75 Watts
- ▶ 3 Watts with optional fan

### Also Includes

- ▶ Fully Configurable Pinout
- ▶ Solder-less wiring

## THERMISTOR TEMPERATURE SENSOR (MODEL 215)

The model 215 LaserMount offers the option of a 10K thermistor for highly sensitive temperature feedback from 0°C to 70°C.

**Highly sensitive temperature sensor, built in.**

## ACCESSORIES

### 200-TRAY

#### 200 SERIES FIBER MANAGEMENT TRAY

The 200-TRAY fiber tray bolts directly to the top of the mount and makes fiber management simple.

### 200-C

#### 200 SERIES LASER COVER

The 200-C cover enhances the stability of the laser by minimizing the impact of ambient air currents.

### 200-FAN

#### 200 SERIES FAN BASE

By using a small fan to force air across the mount's heat sink, the efficiency and performance of the mount is significantly increased. For the 213, this means a thermal performance increase from 3.0°C/W to 1.2°C/W, while the 215 has an increase of thermal capacity from 1.75W to 3W.

## RECOMMENDED CONTROLLERS AND CABLES

The right temperature controller for your application depends on the mount and temperature range your application requires:

### MODEL 213

5240 and 1260B cable suitable for most laser modules.

### MODEL 215

5240 and 1260B cable for case temperature control, a second 5240 and 1260B cable suitable for most laser modules.
